LANGUAGES

French : Native Speaker
English : B2 level
Russian : A2 level

TECHNICAL SKILLS

Programming :

Java, OCaml, C, Python, Ada,
Html/Jsp, OpenMP, OpenGL,
SQL, TLA+, Julia, prolog

IDE :

Vscode, Eclipse, Matlab

APPLIED MATHEMATICS

Optimization
Operations Research
Deep Learning

SOFTWARE ENGINEERING

Automata Theory
Transition Systems
Model-Driven Engineering
Metaprogramming & Testing
Declarative Programming
Semantics & Language Translation

SOFT SKILLS

- Teamwork (projects, scouts)
- Project Organization (budget, schedule, communication)
- sociable and committed

HOBBIES

- Scouting (Volunteer and responsible for a unit of 25 children) + BAFA certification
- Football (academic competition)
- Treasurer, ENSEEIHT Film Club

WORK EXPERIENCE

Production Worker Internship – Oyster and Mussel Farming

Earl de Beg Ar Vill, Lannilis, France

July-august 2025

- Involved in shellfish harvesting, sorting, and preparation for commercial distribution

Exploration Internship - Dassault Systèmes

December 2018

Vélizy, France

- Explored multiple departments, including marketing, R&D, event management, and fablab activities

EDUCATION

Enseeiht (Top Engineering school)

2024 - 2027

Toulouse, France

Department : Digital Sciences

Major : Software Engineering

Intensive Preparatory Program for Engineering Schools

Montigny-le-bretonneux/Versailles, France

2022 - 2024

Focus on mathematics and physics with strong emphasis on advanced analytical, problem-solving, and time-management skills.

ACADEMIC PROJECTS

Compiler Implementation

Implementation of a compiler

Java

Object Detection for Valorant Gameplay

Deep learning algorithm to detect in-game objects from gameplay data

Python, Keras, TensorFlow

3D Rendering Engine

Development of a basic 3D rendering engine

Java, Mesh, Rasterization

Model-Driven Engineering Project

Developed tool support for electronic circuit modeling, validation, and consistency verification.

Eclipse

Multiplayer Catan Web Game

Design and development of a multiplayer web-based version of the board game Catan.

JavaScript, REST, Spring, React

Mobile Agent Platform

Implementation of a middleware platform supporting mobile agent

Brick Breaker Game

Functional implementation of the brick breaker game

Ocaml

Stock Market Simulator

Development of a stock market simulation platform

Java, UML, Agile
